Home Occupation Use Form

In completing the Home Occupation Use Application form, you may find the following information useful:

- 1) A survey of the property showing the location of all structures may be submitted instead of the dimensioned site plan. If you do not have a survey, use graph paper to draw your site plan. The plan does not need to be elaborate, but it does need to show the length and width of the property, the street on which the property is located, the location of the house on the property and the dimensions of the house and any water bodies adjacent to the property.

Use graph paper that is divided into one-inch grids. A good scale for subdivision lots is one inch equals twenty feet. At the 1" = 20' scale, each small square will be 4' x 4'. The thicker lines will be 20' apart. If your property is larger than a subdivision lot, you will probably want to use a scale of 1" = 40' or 1" = 50'

- 2) Instead of a dimensioned floor plan, the applicant may submit a house plan reduced to 8 ½ x 11 with the work area clearly marked and the square footage stated. If you do not have house plans, use graph paper to draw your own floor plan. Be sure that the size of each room is clearly marked, as well as the outside dimensions of the building. Indicate on the plan which scale was used.
