Persons Qualified To Perform Vegetation Surveys, Habitat Evaluation Indices, Wetland
Delineation And Kewep And Umam Analysis In The City Of Marathon, Florida

Any application for development on lots with native Keys habitats must include a *Vegetation Survey*. On land recognized as either palm hammock or tropical hardwood hammock, a *Habitat Evaluation Index (HEI)* is required in addition to the Vegetation Survey. Only scarified lots are exempt from these requirements. Lots characterized principally by exotic vegetation need only verify this and a survey and permit may not be required. Provided below is a list of individuals qualified to perform HEI's and Vegetation Surveys.

Ms. Julie Cheon
71 Tingle Lane
Marathon, Florida 33050
